

Charger

7KW-AC

WALL MOUNTING

Features

- Wall mounted dual type 2 socket with single phase output per socket providing up to 7 kW charging rates.
- Provides 7 kW power at 32 A single phase.
- Containing Type 2 Mode 3 sockets.
- Suitable for all electric vehicles.
- RFID access, LED static indication.
- OCPP compliant embedded communication system.
- These intelligent units are managed remotely over Ethernet access to the internet or OCPP service to operate.
- Ideal for commercial locations, such as car parks, retail and business parks, hotels and fleet depots.
- Typically found at a workplace or on-street location.

Technical Specifications

Input Voltage (AC)	230 V
Maximum Input Current	32 A
AC Charging Output	7 kW
Outlet Sockets	Type 2 socket and type 2 cable with plug
Environmental Protection	IP54
Operating Temperature	-20°C to 50°C
Operating Humidity	To 95% RH Non-condensing
OCPP	OCPP 1.6
Mounting	Wall
Status Indication	LED status indicator, LCD display
Socket Electrical Compliance	IEC 62196-2
Environmental Compliance	IP55 Protected
Over Current Protection	Yes
Earth Leakage Protection	Yes
PRID Reader	Yes
